

A

Survey design hierarchy

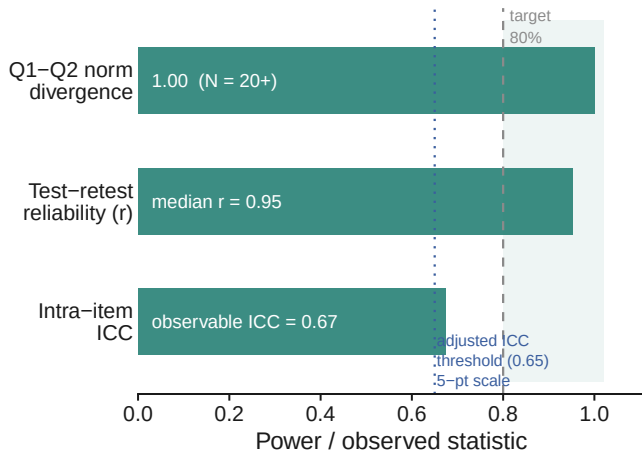

B

Contextual power by vignettes per cell

C

Participant-level effects (N = 20-100)

D

Recommended sample sizes

Criterion	N	Source
Dirichlet pattern classification	50	Dirichlet sim
Q1-Q2 norm divergence	20	ImerTest sim
Agent identity (gender x role)	60	ImerTest sensitivity
Vignette pool -- main effects (10 vpc)	120 vignettes	10 vpc sweep
Vignette pool -- full factorial (20 vpc)	240 vignettes	20 vpc sweep
Role perspective arms (x3)	x3 arms	between-participant
Recommended -- single arm	60	binding
Recommended -- all three arms	180	binding x 3
